**Entry door, appliances, or cabinets door can be interfere with one another if: ..**

.....

- Q1 : The door are not too heavy \_\_\_\_\_ Yes/No.
- If You Live alone \_\_\_\_\_ Yes/No.
- If the door are made up of laminate (they don't scratch) \_\_\_\_\_ Yes/No.
- Entry door, appliances, or cabinets door can be interfere with one another \_\_\_\_\_ Yes/No.
- A1) Yes, If Cabinets door are too heavy can lean out of the hinges and may if won't get soft close as well,select the things which are light in weight and strong
- A2) if i live alone I would prefer an open kitchen rather than kitchen with four wall and entry door. Because big kitchen entry door is a interfere between the beauty of kitchen this what I believe.
- A3) Yes, Laminate with texture are scratch proof laminates are sturdy as well
- A4) If I ignore the working triangle in my kitchen & also I wont plan my kitchen according working area and functional area.

**Show at least one example where a rule from this module was ignored & Explain how was it broken and what can be done about it**

- <https://freshome.com/kitchen/kitchen-work-triangle/>

- First, I would like to appreciate the beauty of dark kitchen with 90% built in appliances which makes this kitchen more settle and modern.
- As I point 90% of appliances, because I wish client would have also choose built in fridge & freezer inside the tall units, if they would have selected the built-in ref, designer would have got an option to match the triangle and design aesthetics as well. Even open shelf looks better beside the built-in ref where glasses and jar can be kept.
